

# LAMISIL

## ANTIFUNGAL FOR THE FUNGUS ON YOUR NAILS

### HOW TO USE LAMISIL

---

For the fungus on your nails:

1. Get your blood drawn
2. Call the office to see if the labs were OK. If they are OK, get your prescription filled. Note: the cheapest place to get the Lamisil is at Walmart (they have an affordable formulary program)
3. Start Lamisil 250mg (1 tablet every day)

### AFTER SIX WEEKS

---

1. Get your blood drawn again. Call our office Call (559) 472-SKIN to let us know you have done this.
2. If the blood work is normal, get a refill of the medication.

Remember that it will take nine months for the toenail to grow out and see that there is no fungus. Be patient.
