

POST DERMABRASION

POST DERMABRASION WOUND CARE

- Directly after the procedure you will have a pressure dressing applied to the area.
- Leave this pressure dressing on for 24 hours.
- After you have removed the initial dressing, wash the area 2-3 times per day with soap and water
- After washing, energetically apply vaseline jelly (given to you by our office). Keep it moist at all times.
- Return to the office for a wound check in 2-3 weeks
