

POST DERMABRASION

WOUND CARE – POST DERMABRASION

- Directly after the procedure you will have a pressure dressing applied to the area.
- Leave this pressure dressing on for 24 hours.
- After you have removed the initial dressing, wash the area 2-3 times per day with soap and water.
- After washing, generously apply Vaseline jelly. Keep it moist at all times.
- Return to the office for a wound check in 2-3 weeks.
- Pain should subside after 2 days. If it gets worse, please contact our office at 472-SKIN (7546).
