

# DEODORANTS

## ARE YOU SENSITIVE TO DEODORANTS?

Mainstream antiperspirants use a variety of chemicals that artificially clog pores. Most have controversial ingredients shown to be potentially unhealthy for our bodies including:

- Aluminum Chlorohydrate
- Aluminum Zirconium
- Aluminum Chloride
- Trichlorohydrate Glycine
- Aluminum Hydroxybromide

## USE ALL NATURAL ALTERNATIVES

- **Crystal** is the world's leading natural mineral salt deodorant. It works to prevent odor while other products attempt to mask it or plug pores with harsh chemicals like aluminum chlorohydrate or aluminum zirconium. Crystal is a hypoallergenic deodorant that is safe, healthy, and totally effective.
- **Toms** deodorant provides clinically proven 24-hour odor protection. This aluminum-free deodorant stick uses the botanical ingredient hops to inhibit the growth of odor-causing bacteria to keep you feeling confidently fresh throughout your day!

Both products are available for men and women and comes in a variety of forms.

## PRODUCTS

Both products are available online and often at Walmart
